

Alastair Barnard MEng

Design Engineer

Alastair graduated in Civil Engineering from the University of Bath, obtaining a master's degree with first class honours. Working closely with Architects throughout his degree, Alastair developed a keen interest in building structures, specialising in mathematical analysis and building materials.

Alastair joined Structure Workshop in 2018 having spent a year gaining early professional experience at Tony Gee and Partners. He has worked on a variety of building projects ranging from small retrofit schemes & extensions to a large masterplan scheme in Kilburn. Alastair has experience designing in all the main building materials with a keen focus on efficient, low carbon design.
