

Angelo Giuliano MEng (Equiv.) in Civil Engineering

Structural BIM Technician

After 15 years working as a Civil Engineer in Italy, Angelo arrived in UK to start his new career as a Structural BIM Technician.

Since 2014, Angelo has worked with design teams in the development of graphical data (2D, 3D) and the scheduling of data to support design activities.

Angelo joined Structure Workshop in 2019 to implement Building Information Modelling (BIM). His knowledge in BIM combined with his experience in structural engineering has allowed for greater collaboration with members of the design team.

Key Recent Projects

Millom Ironworks, Cumbria (IDK Architects) 2020

New Hibernia House, London (William Matthews Associates Architects) 2020

Studio Voltaire, Clapham, London (Matheson Whiteley Architects) 2019

Qualifications

MEng (Equiv.) in Civil Engineering 1998

Bologna University
