

### **Eugénie Sentucq BSc MEng MA**

#### *Graduate Engineer*

Eugénie joined Structure Workshop in 2019 after graduating from the École Spéciale des Travaux Publics de Paris. Whilst studying engineering in Paris, she also began studying Architecture at the École Nationale Supérieure d'Architecture de Paris-La-Villette.

As part of her master thesis, Eugénie explored alternative hydraulic binders containing pozzolanic materials mixed with lime. Her interest in sustainability goes further as she was awarded second place for her essay on the topic of 'climate change crisis demands radical change by all. How must structural engineers respond to the challenge?' as part of the Kenneth Severn Award.

#### **Key Recent Projects**

Carlton and Granville, London (Adam Khan Architects) 2020

Cody Dock, London (Pup Architects) 2020

Embodied Carbon Calculator 2020

#### **Qualifications**

MEng Engineering 2017

*École Spéciale des Travaux Publics de Paris*

MA Architecture 2019

*École Nationale Supérieure de Paris-La-Villette*
