Graduate Engineer:
Mott MacDonald

1989

Pre-University Trainee:
Ove Arup and Partners

Peter has over 25 years of experience in engineering design and trained on large-scale civil engineering works in the UK and abroad. Further to gaining chartered status he took a sabbatical at a London art bronze foundry, before returning to structural engineering to focus on providing services to art and architecture.

In 2004, Peter founded Structure Workshop Limited. The company has worked with many of London's leading architects, and developed a strong reputation for designing elegant and buildable structures.

As Director, Peter maintains responsibility for the conceptual content of all projects. His focus is on collaborative design across disciplines and he has contributed to a wide range of award winning contemporary structures and art installations.

He is an external consultant with the Royal College of Art and Cass School of Architecture.
