

Peter Laidler BEng CEng MICE

Director

After five years working for Mott MacDonald and a further five years working in private practice, Peter founded the engineering design studio Structure Workshop.

Since its inception in 2004 the company has worked with many of London's leading architects and designers and has developed a reputation for designing elegant and buildable structures employing a wide range of materials and construction processes.

As director Peter maintains responsibility for strategic planning and the overall conceptual design approach of the practice. He has personally contributed to many award-winning contemporary structures and installations and enjoys working collaboratively within multidisciplinary teams to develop creative structural solutions that augment the design intent.
