

Sophie Frith MEng

Senior Engineer

Sophie joined Structure Workshop in 2017 having previously worked as a design engineer for Heyne Tillett Steel in London and prior to that a sustainability advisor for KLH in Partridge, Australia.

Sophie is involved in several exciting projects that reflect her key interest in sustainable design and construction. These include a new timber framed dining hall for Homerton College at Cambridge University and a timber framed visitor centre for the National Trust at Winkworth Arboretum.

Sophie is an active member of the Science, Technology, Engineering and Mathematics Network (STEMNET): an organisation focused on providing world-class education in these disciplines for all young people across the UK.
